

RELY ON THE COMPANY WITH MORE THAN **100 YEARS EXPERIENCE**

An award-winning company founded in 1908, Colley Elevator is the longest operating independent elevator contractor in the Chicago area. Based in Bensenville, we are a mid-sized company that provides a comprehensive range of services including maintenance, repair, modernization and new installation.

At Colley Elevator, we pride ourselves on commitment to customer care. That commitment earned us the prestigious 2019 **Best Contractor - North** from Elevator World Magazine.

Contact us today to set up a no obligation survey of your elevator equipment.

MAINTENANCE

Whether you need a complete 24 hour service contract or just annual safety inspections, we tailor our services to meet your needs. When your elevator receives preventative maintenance from our qualified technicians, you minimize the risk of equipment failure and service calls.

MODERNIZATION

Older elevators become less reliable with age and may not meet current code. If a potential shutdown would negatively impact your building's residents, consider investing in a modernization package. We can work with you to evaluate your options, as well as discuss a time frame, to complete the project.

NEW CONSTRUCTION

If you're considering a new elevator, contact us to review your plans. Colley Elevator has installed thousands of elevators in the Chicagoland area. We are so confident in our services that we only install non-proprietary equipment. This means you're never trapped in a contract, or forced to work with only one vendor, once the work is complete.

SERVICE AND REPAIR

Unfortunately things can and do happen. Unlike larger elevator contractors, our technicians are cross-trained on all aspects of elevator repair. When you need help, trust our courteous team of professionals to get you up and running again.
